

# If Only It Was That Simple

# Challenge of System Integrator

- Anticipate Where the User Wants to Go and constraints in getting there.
- Be Prepared to Adjust As Thinking Matures
- Develop Multiple Options for Decision Makers
  - Technologies
  - System Solutions
- Help Focus Technologies to Support Constrained System Designs
- Combine Unique Strengths of Industry
  - Clear Solution Focus-*Profit Motive*
  - Modular Integration-*Balanced solution*
  - Clean Interfaces-*Key to multiple variants/Utility*
- Reach for High Technology Road, but Always Have an Alternative Ready

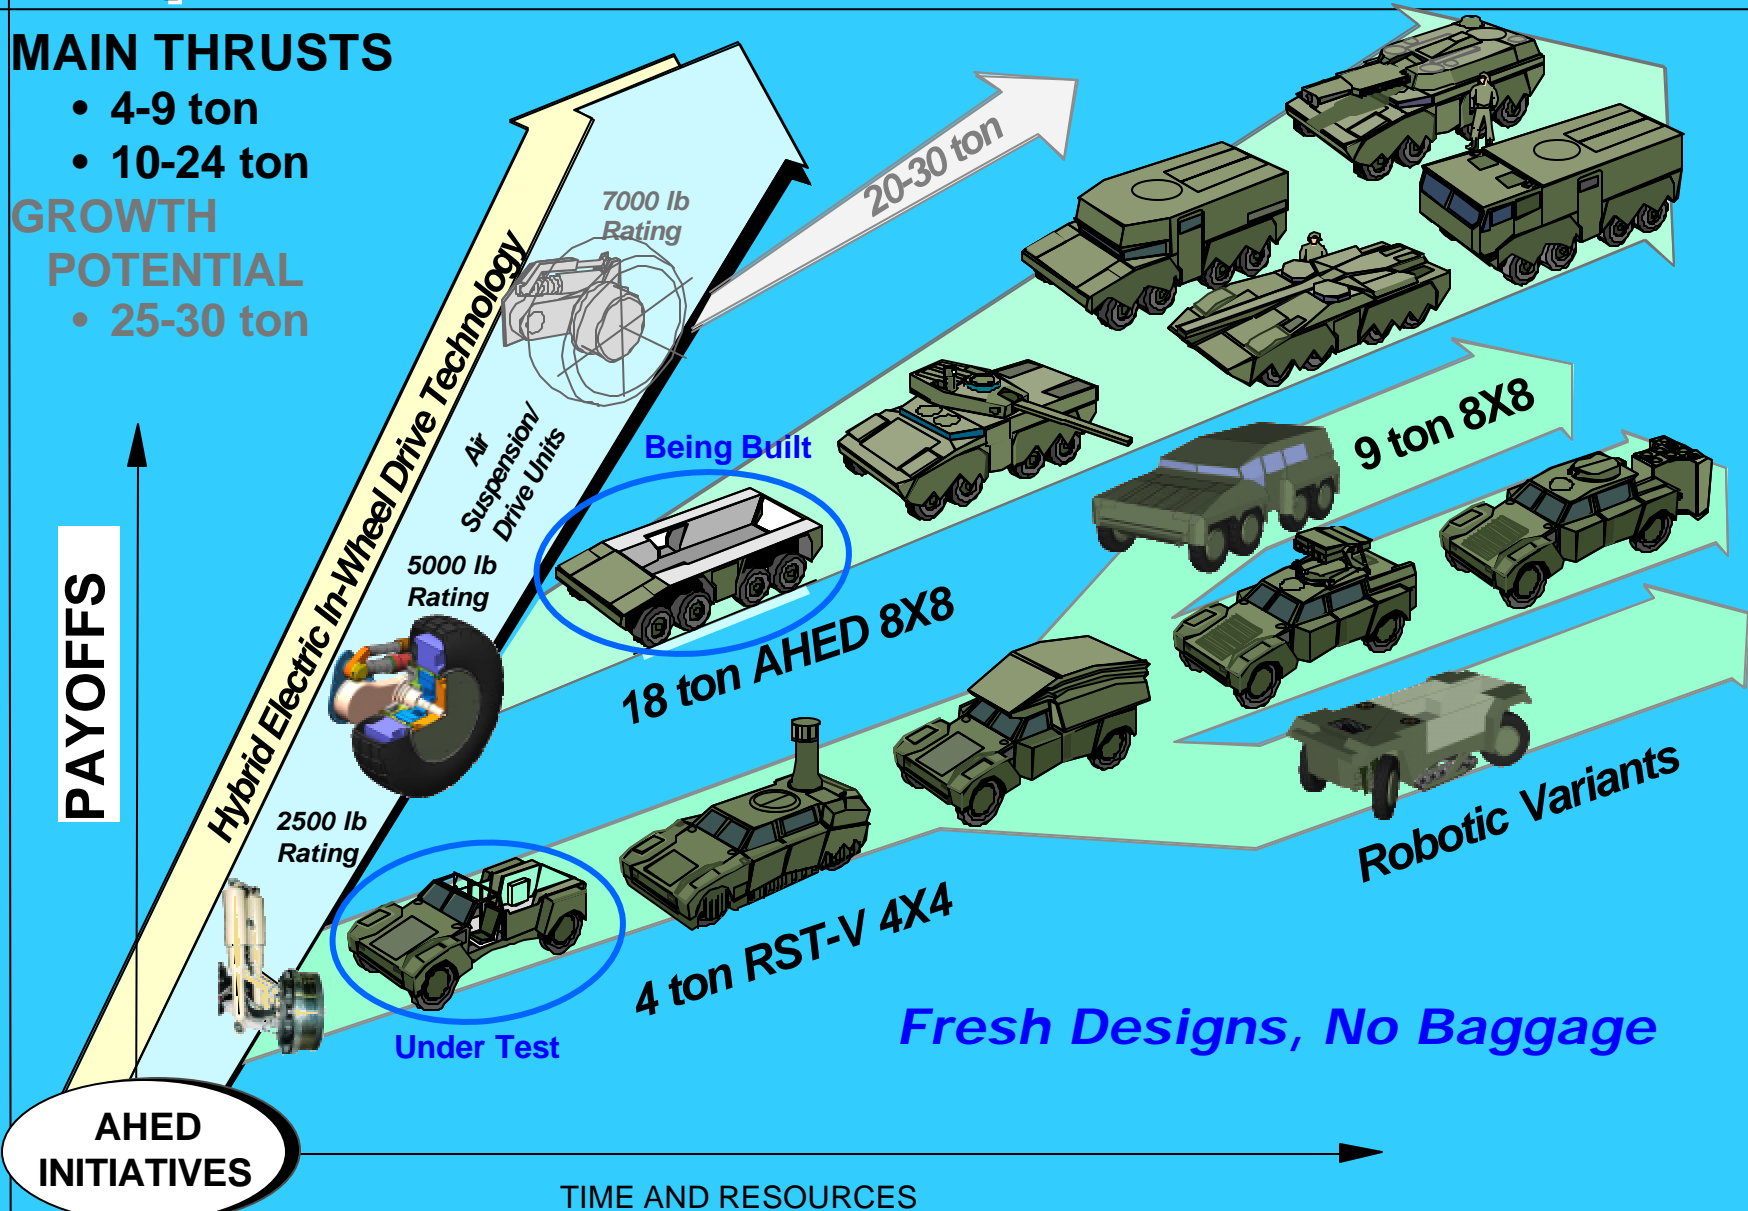

# Options in Place for FCS

## MAIN THRUSTS

- 4-9 ton
- 10-24 ton

## GROWTH POTENTIAL

- 25-30 ton

TIME AND RESOURCES

# The Customer Must Do His Part

---

- Successful System Designs have three major ingredients:
  - Minimal Requirements
  - Balanced Design
  - Maximum Utility
- Minimize Absolutes (KPP's). Prioritize and band performance standards.
- *Platform Integrator Needs Flexibility, with Government, to Make Trades as Technology and Analysis Mature.*
